CARBON, ALBERTA, THURSDAY, NOVEMBER 14, 1929

\$2.00 A YEAR IN ADVANCE

JACK CODE IS RINK MANAG'R

A general meeting of the Carbon Curling Club was held in the Municipal office on Wednesday night last and fair representative of the members was present. In the absence of the elected president, G. W. Malton, S. F. Torrance occupied the chair and later it was pointed out that Mr. Malton declined to accept his appointment of president and the vice-president, S. F. Torrance was elected to fill the vacancy of president and Percy Edwards was elected to the office of the vice-president.

The expenses for the coming season were outlined and it was decided that the rinks could not be run on a fee of less than \$12.50 and this will be the curling fee for the coming season.

The means and making of ice in the rinks was discussed and a committee composed of Messrs. J. Flaws, Sam. Garrett and the caretaker was appointed to look into this matter and have ice making commenced immediately if the weather permitted.

The appointment of a caretaker was left in the hands of the Executive committee and the tender of John Code was accepted and he will operate both the Curling and skating rinks this winter.

ALBERTA HOUSE TO MEET IN JANUARY

The Alberta house will not be summoned before Christmas, but Premier Brownlee states that the indications are that the government will have its work in shape to call the session earlier than in previous years; but the date has not been considered as yet. The government is now going through its departmental business with a view to preparing for the session, and each department will be checked up by the premier during the next few weeks in order to ascertain what, if any, new legislation it will require and what will be necessary to get its report ready for submitting.

DANCE ON MONDAY NIGHT NOT VERY WELL ATTENDED

A very enjoyable dance was held in the Elks Hall on Monday night under the auspices of the Carbon Curling and skating rinks. This dance was staged by the Carbon Elks and the entire proceeds were to be turned over to the Curling club to be used in getting the skating ice in shape this season. It was regrettable, however, that very few curlers and skaters turned out and as a result the net proceeds were not as great as was expected. The Swallow orchestra played their usual high standard of music and a number of the outsiders were present at this dance. Supper was served as usual at midnight and the dance proceeded into the wee small hours of the morning. A small sum will be turned over to the skating rink as a result of this dance.

PROVINCIAL FINANCES IN BETTER SHAPE THAN EVER

The public accounts of the province of Alberta for the fiscal year ending March 31st, last, have just been issued. It cost to run Alberta for the last fiscal year \$21.36 for every man, woman and child in the province and to meet this expense bill there were revenues figuring out to \$23.83 per capita. The surplus thus rolled up in the provincial treasury was \$1,817,871. This total includes \$239,048 on the government telephone account, the remainder being on general account.

Increases in four lines of government business were mainly responsible for excess revenues over the estimates. These were the gasoline tax, which yielded in all \$1,306,627; amusement tax \$245,802; automobile licenses \$2,124,972 and liquor profits \$2,893,785.

Expenditures were also larger than the estimates by \$424,000 for which the largest single item was school grants, interest charges, hospitals, social services and maintenance of buildings all showed increases.

The bonded debt of the province as at March 31, 1929, is put at \$92,774,157, as against \$87,541,931 for the preceding year, the increase being accounted for by expenditure of roads, bridges and railways.

LITTLE ITEMS OF LOCAL INTEREST

Don't forget the dance to be held in the Gamble school on Friday, November 22nd.

R. Lynn and J. Taylor were Calgary visitors over the holiday.

Miss Phyllis James was a visitor to the city over the week end and returned on Monday.

Miss Kennie of the local teaching staff spent the week end holiday at her home in Calgary.

Mrs. S. Lilja has accepted a position in C. H. Nash's store.

Hugh MacDonald, who is attending Normal school in Calgary, spent the week end with his parents here. He returned to the city on Monday.

Jack Hamshaw of Coaldale came out to Carbon last Sunday and spent a day with Wilfred Poxon. He returned Monday morning.

Mr. and Mrs. Clayton Hay and son spent Thanksgiving with Mr. and Mrs. A. Hay.

Miss Edith Braisher, who is attending Garbutt's Business College in Calgary, spent the holiday with her parents here.

Ernie Morfitt of Claresholm, was renewing acquaintances in Carbon over the week end. He returned to Claresholm on Tuesday.

Miss K. Watkins was a Calgary visitor over the week end and returned on Monday.

Miss Laura Beckwith visited at the home of Jas. Clayton for a few days last week.

Miss Millar from Olds spent the week-end in Carbon visiting with her sister and brother-in-law, Mr. and Mrs. G. Livingstone.

Mr. and Mrs. McLeod of Calgary, came out last Friday and spent the week-end with Mr. and Mrs. R. C. Barr.

Bill Edwards was a Calgary visitor over the week end.

Mr. Burnett of Red Deer, is in town this week checking over the heating apparatus in the Elks Hall. Mr. Burnett is a brother of the late Charles Burnett, who had an interest in this building.

A real Alberta Chinook is blowing at the time of going to press and we may lose all of the snow that fell over the week end.

Alex Sobyski is back again after spending a month at East Coulee where he has been working in the mine.

The ladies of the Catholic Women's League will hold a Bazaar, tea and sale of home cooking in the Farmers' Exchange Hall on Saturday afternoon, November 16th. The lucky number will be drawn for the geese which are being raffled off.

HIS ERROR

Finnegan got a job as jester to the king. His duty was to keep his majesty in good humor. One day the king was taking his bath and the door of the bath room was slightly ajar. As Finnegan passed, in a prankish moment, he reached in, slapped the king on the back and ran away. The king became very indignant and had Finnegan brought to the throne room. He addressed him lustily:

"Finnegan, you have insulted me, and if you have any good reason why I should not have you beheaded, state it now."

"Sure, your majesty," replied Finnegan, "I didn't know it was you in there at all. I thought it was the queen."

ALEX REID OF CARBON BUYS PRIZE SHEEP AT STOCK SALE

Alex Reid of Carbon attended the live stock sale in Calgary last Wednesday and while there he purchased two Oxford rams, the winners of first and second prizes in this class. Mr. Reid intends using these rams for breeding purposes and will place them on his farm 2 miles west of Carbon. The following item appeared in the Calgary Albertan regarding the purchase of these rams: "In this division (Oxford Rams) the highest figure for an individual went to an entry by A. S. McDougall of Champion, sold to Alex Reid of Carbon for \$110. B.H.A. McDonald of Champion sold two head for \$75 each, one to Alex Reid of Carbon and the other to Alex, Brookbank of High River."

HON. J.A. ROBB SUCCUMBS AFTER SHORT ILLNESS

Just when it was believed that Hon. J.A. Robb, Canada's veteran minister of finance, had triumphed over death from pneumonia, death came from an unexpected quarter. Mr. Robb died in Toronto Monday afternoon following a stroke of apoplexy. The seizure was about noon and the minister succumbed four hours later.

Mr. Robb died in harness as he had frequently expressed the wish to do. He died apparently without pain. Mrs. Robb was with him in his last hours, also his sister, Miss Christine Robb, of Huntingdon, Que., Hugh Donaldson, of Toronto, son-in-law; William McDonald of Montreal, cousin and business partner; Walter Sellar, secretary, and Dr. D. Arcey Prendergast, physician.

The minister's fight against pneumonia was long and valiant. At first the illness was not thought serious, but pneumonia set in on Oct. 28. Towards the end of last week, the physicians noticed distinct evidence of improvement, the patient was sleeping well and vital conditions became normal. On Sunday the bulletin said that "barring complications" the patient might be said to be out of danger.

But apoplexy stepped in where the forces of pneumonia were being driven out. Dr. Prendergast does not think the heart was appreciably weakened by the siege of pneumonia, but the general condition of the patient would not withstand the renewed assault. Just before noon he suffered a stroke of apoplexy from which he never recovered consciousness. He sank gradually and died shortly before 4 o'clock.

The late James Alexander Robb was 70 years of age at the time of his death.

FIRST REAL SNOWFALL EXPERIENCED SATURDAY

The first real snowfall of the season was experienced on Saturday of last week and Sunday morning the ground was covered with about six inches of the wintry mantle. The temperature dropped Sunday night and although the days and nights are not real cold, the appearance of winter is at hand and many believe that that season has now definitely commenced. The snowfall has not hindered the traffic and the roads are reported to be in good condition throughout the district, no snowdrifts having been encountered by motorists.

'STAR BRIGHT' TO SHOW DEC. 6

Friday night, December 6th has been the date set for the first showing of the comedy-drama "Star Bright," in Carbon. This play is in three acts and is full of "vim and vigor" from start to finish and at all times the theme is kept before the audience with occasional comedy parts to defer any monotony which might seem to occur throughout the entire play.

This comedy drama is being staged by local players under the auspices of the Carbon Elks. Don't forget to keep this date, (Dec. 6th) open. Tickets will be on sale shortly and those who wish to take in the first showing of this performance are advised to purchase them as soon as possible. The hall will seat approximately 300 persons and when this number of seats are taken the ticket sale will be closed for the evening of December 6th. However, it is expected that this play will be shown a second time in Carbon so everyone will get a chance to see the play if they so desire and cannot present the first evening.

CARBON HAS BOOSTERS

The following was clipped from the last issue of the Three Hills Capital: "Carbon appears to have a good live bunch of booster. A local syndicate in conjunction with Calgary capital, has been formed and some 15,000 acres of oil land has been fyled on near the creek north. A company is being formed to put down a test well. Indications of oil and gas are similar to those long known to exist along the creek in this district."

NOTICE

A demonstration of the usages of the Litz Dixie Mill for cutting and grinding up all kinds of rough fodder into digestible animal feeds will be given on Alex Reid's farm 2 miles west of Carbon on Tuesday, November 19th at 2 p.m., weather permitting. The Litz Mill is for using up feeds that would be otherwise wasted and a big saving a year such as this when feed is scarce. All interested please come.

ALEX REID

Hubby: I like those clinging gowns on you my dear."

Wife: "Well, I'll say you must. This one has been clinging to me for over a year."

An old gentleman, reading the paper, remarked to his wife: "This paper says that for every missionary sent abroad last year this country sent 2000 bottles of whiskey."

"Bless my heart!" replied the old lady. "Does it say what he does with it all?"

"The doctor will see you inside," said the nurse to the patient as she helped him on the operating table.

He: "We're coming to Connaught tunnel. Are you afraid?"

She: "Not if you take that cigarette out of your mouth."

As a rule Man's a fool. When it's hot he wants it cool; When it's cool, he wants it hot; Always wanting what is not.

The Problem of Narcotics

The evil of narcotics is one that strikes both directly and indirectly at the home.

There are about 8,000 drug addicts, or dope fiends, as they are more commonly called, in Canada. They consume, and here is an even more startling figure, about \$80,000 worth of drugs every day.

The danger from the widespread use of narcotics in Canada, is that drug addicts breed drug addicts; each one is an agency of evil who will try to pull other victims into the mire in which he finds himself.

The four main drugs that have assailed Canada are opium, morphine, cocaine and heroin. Opium is the juice of the white poppy, cultivated mainly in Hindustan and Asiatic Turkey, and thickened by evaporation.

Opium would not be so important to us, but for the fact that other drugs that are used most extensively in Canada, come from opium.

About one hundred and twenty-five years ago, a French chemist found that he could produce another drug, morphine, which was named after the god of sleep, Morpheus, from opium.

Sixty-five years later another chemist, this one an Austrian, found by experimenting with cocoa leaves that he could produce cocaine.

Just thirty years ago, a German chemist found he could take from opium still another drug, which was called heroin. It is three or four times stronger than morphine, and is blamed largely for the increase in drug usage on this continent since the war. At first heroin was not believed to be habit-forming, and was used on that assumption. But two years after its discovery, it was found to be as bad, if not worse, in getting a grip on its victim. It has been renounced by the medical profession as not at all necessary for their purpose. But it continues in use throughout the world, a dangerous drug, without any redeeming feature or excuse for its existence.

All these three drugs, morphine, cocaine and heroin, are white powders, bitter to the taste and soluble in water. All are deleterious, both mentally and physically. The habitual use of any of them will bring death with inexorable certainty. Opium is the slowest to kill, morphine, the next, while heroin is the most rapid of all.

For example, to compare the drug habit with the liquor habit; five ounces of alcohol is considered a fatal dose. Five ounces of morphine taken at one time will kill fifteen hundred men.

Chemistry has given us these drugs, and passed them on to the medical profession. The doctors used them, with the exception of heroin, to assuage pain. But mankind was not satisfied with that, and the use of these drugs spread to people who did not need them. Now the combined wisdom of chemistry, medicine, and governments, is not sufficient to strike down the peril.

There are fantastic stories at times of people who have become drug addicts because they were given one of these drugs in a time of need, and that one administration made them addicts. Those are very rare cases, and hardly need to be taken into consideration. The use of drugs is spread about almost entirely by people who profit greatly by creating other addicts.

Thousands of tons of poisonous drugs are consumed every year by the human race. Less than one per cent. of the total consumption is necessary for medicinal purposes.

Before heroin came into such general use, adults were, in the main, the only addicts. The dealers in heroin, however, recruit among their customers young children. The average age of the heroin addict is about 22 years of age, which means that he must have become addicted some years before he was twenty.

Again to compare the drug habit with the liquor habit: It takes some time of regular drinking before a youth becomes a regular drunkard. Not so with heroin. An ounce of heroin can make two thousand addicts within a week. As well as that, a drunkard sometimes serves as a useful example with which to point the warning finger. In fact a drunkard as a general rule, will advise others to keep away from the stimulant that caused his downfall. Not so the heroin addicts. He begins right away to drag others into the net. He is used as a recruiting agent for the operators who are making the money. The more heroin he gets, the more he craves. He is told that in order to get more of it, he must introduce more customers. And so the peril spreads.

Preserving Old Windmills

Germany is preserving its old windmills because of their historic value and their picturesque touch to the scenery. To raise funds for their preservation many of the windmills have been fitted up as rest houses, where young people on walking tours can get a night's lodging at a low rate.

Didn't Interest Him

An actor, who, because of his wandering profession had seldom paid his income tax was at last discovered by the authorities, who promptly sent him a return to complete.

The actor kept it for a few days and sent it back with a little note: "Thank you very much, but I don't wish to join this affair."

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Fighting Forest Fires At Night

Miner's Carbide Lamp Used By Rangers In Work Of Extinguishing Fires

Equipment is now in use by the Forest Service, Department of the Interior, which enables rangers to fight forest fires at night, when such work is most valuable, owing to the fires dying down at dark. The chief item of special equipment is the miners' carbide lamp, which is attached to the fire-fighter's cap and so is located just above his forehead. This leaves his hands free to work, and gives the light just where desired, both for travel in reaching the fire and for the work of extinguishing the fire.

WOMEN WHO SUFFER

Anaemia Responsible For Most Of The Ills Of Girls and Women

Medical science shows that most of the ills that afflict growing girls and women are due to the fact that the blood is either poor in quality or deficient in quantity. This anaemia is the cause of low spirits, languidness, the poor appetite, breathlessness, and the aching backs that make life a burden for so many women. There is no need for any woman to suffer in this way, for all the miseries of anaemia can be quickly banished by taking Dr. Williams' Pink Pills. It is an established fact that these pills create an abundance of new rich blood—their wonderful reputation is based on that.

Thousands of formerly weak and ailing women have cheerfully testified to the fact that they owe their restoration to good health to Dr. Williams' Pink Pills. One of these is Mrs. Napoleon Gallant, Tignish, P.E.I., who says: "I am among those who can strongly recommend Dr. Williams' Pink Pills. Before I began using them I was in an extremely nervous condition. I could not sleep, neither could I eat, and was constantly growing weaker. I got medicine from a doctor, but it did not seem to meet my condition, and then, on the recommendation of a friend, I began to take Dr. Williams' Pink Pills. By the time I had taken a couple of boxes there was no doubt they were helping me. I continued their use until I had taken six or seven boxes when I was again in the best of health. I always keep Dr. Williams' Pink Pills in the house, and if any member of the family feels run-down the pills soon put them in good condition."

The best time to begin taking Dr. Williams' Pink Pills is the moment you feel the least bit out of sorts. The sooner you do so the sooner you will regain your old-time energy. You can get these pills through any medicine dealer or by mail, postpaid, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Power Of Sound Waves

If Highly Pitched They Will Do Much Damage

Living creatures can be struck dead by sound waves too highly pitched for the human ear to hear them, writes T. C. Bridges. These high frequency waves—called super-sonics—have been tried on animals and produced instant death. The sound appears to shatter the blood corpuscles, and death is as sure and sudden as if the creatures had been struck by lightning. Sound can do many things which seem mysterious and almost miraculous. For instance, fire can be extinguished by sound. Some little time ago Mr. Charles Kellogg, of California, gave a demonstration of the power of sound over flame, and by drawing a violin bow across a piece of aluminium extinguished a burning gas jet at fifty feet. Sound vibrations can not only break a wine-glass but can damage a building. It is suspected that the deep, vibrating notes of organs can cause vibrations which may actually weaken the structure of a church or cathedral. The very latest wonder of sound is to make an aeroplane light up the aerodrome at which it is arriving merely by a note of its siren. This was done recently at Newark, New Jersey.

Exporting Electricity

Electricity is exported from Canada only by license granted by the Electricity and Gas Inspection Service of the Department of Trade and Commerce, and the same branch of the department has jurisdiction over the export duty which has been imposed since April 1, 1925.

It is estimated that 15,000 public speeches are made every day of the week throughout the year.

Foot Sore? Use Minard's Liniment.

Joint Branch Line

Programme Announced

Thornton and Beatty Publish Plans For Alberta Railways

Announcement has been made jointly by Sir Henry Thornton and E. W. Beatty, of the branch line programme to be commenced in 1930 by the Northern Alberta railways. The presidents of the two transcontinental systems, which jointly own the Alberta railways, point out that under the agreement for acquisition the purchasers undertook to build within five years sixty miles of branch lines, in addition to the branches under construction by the government of Alberta at the time the purchase was made.

To meet the traffic needs of the district, and in fulfilment of statements previously made, the directors of the Northern Alberta railways have, therefore, decided to recommend to the government and to the directors of the Canadian Pacific, the commencement in 1930 of a line from Hythe to Rolla, a distance of fifty miles, and from Fairview westerly, a distance of 15 miles. In addition, the Northern Alberta railways will, during the coming year, undertake to investigate the traffic possibilities of an extension west from Spirit River and from a point at or near Grimshaw, to serve the Battle River district in which considerable settlement has taken place.

The programme announced is of considerable magnitude and confirms the statement already issued that in the opinion of the Canadian National and Canadian Pacific companies, the most important and immediate work in the development of the Peace River area is the construction of branch line mileage.

To Honor Pioneer

Premier Tolmie, Of British Columbia, To Be Present At Celebration Of Mount Rainier's Discovery

Nearly 100 years ago Dr. William Fraser Tolmie, physician of the Hudson's Bay Company, at Fort Vancouver, Washington, trudged up the Puyallup River to Mount Rainier, the first white man to reach a peak now known as a scenic resort.

In 1933, the centenary of this expedition, Dr. Tolmie's son, premier of British Columbia, will be the guest of honor at a celebration of Mount Rainier's discovery.

The premier has accepted the invitation of the Rainier National Park advisory board to take the leading part in the ceremony a little over three years hence.

Canadian Fliers Organize

First Convention Of Its Kind Held At Fort William

With nearly 20 delegates from coast to coast in attendance, the first all-Canada aviation convention was held recently at Fort William. J. A. Sully, president of the Winnipeg Flying Club, was chosen chairman of the initial meeting.

The first business of the convention was the organization of a central body of the flying clubs throughout the Dominion, to be known officially as the "Canadian Flying Club Association." This association will be official spokesman of the various clubs throughout the Dominion, and will attempt to solve many of the problems which today face aviators from the Atlantic to the Pacific.

Delegates from the several clubs will be known as the board of governors and this body annually will choose a president, five vice-presidents, one honorary secretary and an honorary treasurer. The vice-presidents will be regional officers, from the following districts:

British Columbia, Alberta and Saskatchewan, Manitoba and Thunder Bay district, Ontario east of Thunder Bay and Quebec and the Maritimes.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Exterminator.

Reason Prince Sold Hunters

When the Prince of Wales abandoned fox hunting and sold his horses this year, he did so not for his own personal safety, as was generally believed, but because the prohibition of fox hunting was about to come before Parliament and the heir to the throne must not become involved in any political issue.

Needless Pain!

The man who wouldn't drive his motorcar half a mile when it's out of order, will often drive his brain all day with a head that's throbbing.

Such punishment isn't very good for one's nerves! It's unwise, and it's unnecessary. For a tablet or two of Aspirin will relieve a headache every time. So, remember this accepted antidote for pain, and spare yourself a lot of needless suffering. Read the proven directions and you'll discover many valuable uses for these tablets. For headaches; to check colds. To ease a sore throat and reduce the infection. For relieving neuralgia, neuritis, rheumatic pain.

People used to wonder if Aspirin might be harmful. The doctors answered that question years ago.

It is not. Some folks still wonder if it really does relieve pain. That's settled! For millions of men and women have found it does. To cure the cause of any pain you must consult your doctor; but you may always turn to Aspirin for immediate relief.

RELATIONS WITH RUSSIA RESTORED BY LABOR PARTY

London, Eng.—Full diplomatic relations are to be restored between Great Britain and Russia.

By a vote of 324 to 199 the House of Commons have approved the government's motion for resumption of such relations and at the same time rejected a Conservative amendment which had condemned any resumption until the preliminary conditions have been satisfied. There were stipulations in regard to Soviet propaganda.

The decision regarding Russia capped a full day in both the House of Commons and the House of Lords, for the upper chamber was occupied with the latest development in the Indian constitutional problem. Such a day is not often experienced, even at Westminster.

The Commons began eagerly, expecting Prime Minister Ramsay MacDonald's report of his mission to the United States, and his subsequent visit to Canada. Scarcely had Mr. MacDonald concluded, when the House of Lords began a debate on the "mystery of the proclamation by Lord Irwin, viceroy of India, which affirmed the British Government's desire to accord full dominion status to India in the fullness of time."

The doom of the Conservative amendment regarding relations with Russia was speedily sounded in the House of Commons by Right Hon. David Lloyd George, Liberal leader, who wields the balance of power. Right Hon. Stanley Baldwin had charged Right Hon. Arthur Henderson, foreign secretary, with "surrendering" to the Soviet representative in the negotiations leading to resumption of relations. Mr. Henderson denied there had been any surrender.

The foreign secretary stressed that under the new protocol, the governments of Great Britain and Russia would reciprocally confirm the pledge in regard to propaganda immediately the actual exchange of ambassadors took place.

Mr. Lloyd George then indicated the Liberal attitude by describing the break in relations with Russia initiated by the former Conservative Government, when Arcos House, in London, was raided "as an act of supreme silliness." He concluded "I say God speed the foreign secretary."

Several Conservatives supported the Labor Government in the division. These included Lady Astor, John Buchan (noted novelist), and Robert Boothby, member for Eastern Aberdeen and Kincardine.

The vote approving the government's motion for restoration of relations, marked the first definite accomplishment of Mr. MacDonald's government since other negotiations in the foreign fields, as well as schemes for relief of domestic unemployment, have yet to be submitted for parliamentary approval.

Not a single dominion had expressed opposition to the policy which had been pursued, declared Mr. Henderson. Replies received by the government indicated it was generally recognized that the renewal of relations sooner or later was inevitable.

Coming To Canada

Thousands Of Mennonites Would Leave Russia For This Dominion

Moscow.—Three thousand Siberian peasants of German descent, mostly Mennonites, have received passports to migrate to Canada. Before granting the passports the Soviet authorities exacted full payment of taxes and specified that the emigrants deposit all their possessions in Soviet banks, since exportation of rubles is forbidden.

Seven thousand of the would-be emigrants are concentrated in camps around Moscow obtaining passports at the rate of 100 per day.

Walker Again Mayor Of N.Y.

New York.—Mayor James Walker, more familiarly known as "Jimmy" to the millions of the metropolis, was swept into office again for another four years on the crest of a Democratic tidal wave of great proportions. He defeated Congressman Fiorello H. LaGuardia, candidate of the Republicans and Fusionists, by a plurality of 497,165.

India Favors Idea Of Dominion Status

British Viceroy's Declaration Has Removed Tension From Politics

New Delhi, India.—Opinion in India has now crystallized into definite comment on the Viceroy's historic declaration of November 1, making it clear that the favorable response is wider than might have been expected. The Viceroy's affirmation of the British government's desire that India should attain dominion status in the fullness of time, and pointing out a conference should be held in London to clear up relations between British India and the native states of India, is described as removing with one bold stroke all the electric tension from Indian politics.

Anglo-Indian newspapers not only were the first to describe the announcement as wise, but they also resented the opposition voiced in the British press. Both progressive and press opinion is being modelled on the lines of the statement issued by 30 members of the Indian Nationalist Congress and other leaders, including M. Ghandi, great upholder of Indian nationalism. This statement gives conditional acceptance, suggesting a livelier spirit should be infused into the government of the country until a new constitution for India actually comes into existence.

The depressed masses and Indian Christians welcome the Viceroy's announcement and ask that their interests be protected at the conference.

Dog Rescues

Wounded Trapper

Carried Note To Nearest Camp and Returned With Help

Nakina, Ont.—Once again man owes his life to the intelligence and faithfulness of a dog. Andrew Syvitski, 22, accidentally shot himself when he drew a revolver from his holster while hunting at an isolated camp at Pine Lake.

Realizing his predicament and knowing that he could not reach the nearest trapper's cabin himself, Syvitski scribbled a note and fastening it to his dog's collar, ordered the animal to proceed to the nearest camp, owned by Thomas Hughes.

The dog ran through three miles of bush and swam a river to reach Hughes' cabin.

Hughes, with the animal leading the way, reached Syvitski's camp and after rendering first aid, brought the man to his own camp. A railway speeder brought the wounded man to Nakina, and he was later rushed to Port Arthur by train.

Cheers Greet Premier

MacDonald Receives Hearty Welcome From Members Of House

London, Eng.—Taking his place on the front bench of the House of Commons for the first time since his return from his notable visit to America, Premier MacDonald was greeted with loud cheers from the members. Many of them rose to their feet and waved their order papers in salute.

Mr. MacDonald, resuming the leadership of the government in the Commons found a packed house awaiting what promises to be a highly important utterance on unemployment from Rt. Hon. J. H. Thomas, Lord Privy Seal and Minister of Employment.

This is an issue that friends and foes of labor are watching with the keenest attention and the government's handling of it has vital bearing on its fate.

Would Fly Across Atlantic

Russian Airmen Ask Permission To Resume Return Journey

New York.—The four Russian aviators, members of the crew of the "Land of the Soviets," which flew from Moscow to New York, have wired Soviet officials for permission to fly across the Atlantic ocean to England. They hope to leave in two weeks from Harbor Grace, Newfoundland.

Semyon Ashestarov is chief pilot and commander of the Soviet plane, and P. E. Bolotov, B. V. Sterligov, and D. V. Fufayev, are members of the crew.

MENTIONED FOR IMPORTANT POST

Lord Arnold, British paymaster-general, who accompanied Ramsay MacDonald on his visit to this country, is being prominently mentioned in British Labor party circles as possible successor to Sir Esme Howard, British ambassador to the United States, soon to return from Washington.

Americans Settling In Saskatchewan

Many Farmers Coming To Make Homes In Canada

North Portal, Sask.—Despite the wintry weather settlers from the United States are coming to Western Canada. During the past few days six carloads of stock and effects have cleared customs at this port. Alfred Hakenson shipped two cars from Wendell, Minn., to Aneroid, Sask., where he had farmed for some years, but a year ago returned to Minnesota and started in poultry and dairy farming. The call of the broad prairies was too strong.

Frank McKnight, also a Canadian many years ago, shipped two cars from Noley, Mont., to Leslie, Sask., where he is renting land from a brother. While in the Soo yards at Portal, N.D., Mr. McKnight was struck by a freight engine, his leg being injured so that he had to be taken to a hospital for treatment. His stock and effects were looked after by Clarence Reed, who was a neighbor in Montana and who also is immigrating to Leslie, Sask., with a car of stock. Mr. McKnight was able to leave the hospital later and left for Leslie on a passenger train.

L. Matzdorf, from Burlington, N. D., shipped a car to Hythe, Alta., where he has taken a homestead.

Postpone Pool Convention

Brandon, Man.—The Manitoba Wheat Pool has postponed its annual convention. Instead of meeting in the city, November 5, as originally planned, the convention will gather here on November 19, 20 and 21.

Aviators Killed In Montreal

Seaplane Of Canadian Government Crashed While Being Tested

Montreal.—Pilot Officer Paul Garton Stanley, 23, of Toronto, and flying Officer John L. McLaughlin, 35, of Montreal, were almost instantly killed when a Canadian Vickers "Vedette" seaplane which they were testing for the Canadian government crashed in a field near Sault Aux Collets. The plane buried its nose in the soft surface of the field and by the time the two airmen were released they were dead, crushed in the wreckage.

McLaughlin was a test inspector and Stanley was flying the seaplane. They had made a previous test flight early in the day but the weather conditions were not suitable for flying and a second flight was attempted in the afternoon. It was believed that the machine had gone into a spin at a time when, owing to the low "ceiling" the pilot was unable to recover before reaching the ground.

Take Money and Food From Peasants

Families Migrating From Germany Deprived Of Everything Is Report

New York.—The following wireless from Kiel, Germany, was published in the New York Times:

"Fifty-three peasant families comprising 323 persons, whose ancestors migrated from Germany to Russia under Catherine the Great, and who, together with about 5,000 other peasants desire to migrate to Canada, arrived here aboard the Soviet steamer 'Felix Dersshinski,' without money or food.

"According to their own statement they were searched bodily before sailing and deprived of all money and food.

"It is rumored the Canadian government has already agreed to pay for their transportation to Canada and to provide the peasants with agricultural tools and other necessities."

Predicts Era Of Disease

New York Physician Says Slum Conditions In Europe Unbelievable

New York.—Senator Royal S. Copeland, of New York, on his return from a twelve weeks' visit to Europe, said he never saw such abject poverty as in the slums of European cities. He said conditions in the poorer sections were almost unbelievable and predicted they would result in an era of disease. "This country," he said, "must guard itself against that by strict immigration regulations. The examination of aliens must be more thorough and there must be more men to do it."

Senator Copeland is a physician and a former commissioner of health in New York City.

TWO GREAT PREMIERS MEET

Right Hon. J. Ramsay MacDonald, Prime Minister of Britain, compares notes with Right Hon. W. L. Mackenzie King, Prime Minister of Canada, when the two Premiers met at the Canadian National Railways station, Ottawa, where Premier MacDonald had just alighted from the car "Bonaventure," which carried him across Eastern Canada.

PROBLEMS AWAIT NAVAL PARLEY IN JANUARY

Washington.—In the swing of time toward January and the five-power disarmament conference in London, the government here and officials of the state and navy departments are hard at work upon the case for the United States. While in the main Great Britain and the United States are agreed upon what status it is necessary for each to maintain in the much-discussed cruiser class, it has been emphasized here again and again that no satisfactory agreement may be arrived at without the assent of all the powers concerned, and this opens a wide field for research containing both technical and political elements.

Secretary of State Henry L. Stimson has been for some weeks past continually in touch with the general board of the navy and he and Under-Secretary of State Joseph P. Cotton, have also consulted frequently with President Hoover.

Ambassador Charles G. Dawes, a fourth member of the delegation, is expected to stay for some time at the White House, during his present visit here from London, an opportunity will be afforded them for complete canvassing of the whole position. President Hoover places large hope upon the London conference.

The chief problem as the situation is viewed from Washington, concerns the powers of France and Italy and Great Britain and geographically as situated in the Mediterranean.

First, France and Italy must arrive at an agreement upon parity, which they may do between themselves. But both France and Italy are opposed to the abolition of the submarine, favored by both Great Britain and the United States.

"The poor man's battleship" has an interesting significance in the Mediterranean wherein is one of the great trade routes of the British Empire.

Another matter which receives attention here is the proposal of France that London results should be validated at Geneva—a suggestion which finds no favor in the United States.

Japan, it is indicated, would like to have her cruiser strength proportionately to the British and American fleets, making her seven to ten instead of as at present.

Gives Report On Settlement

Canadian Congress Of Labor Has Idea To Absorb Immigration

Winnipeg.—Large scale development of unoccupied areas in Canada through agricultural and industrial development is recommended by the executive board of the all-Canadian Congress of Labor, in the board report submitted to the third annual convention. Such a plan, it is advanced, would absorb immigration to this country without detriment to the Dominion. The co-operative settlement idea advanced by the Labor Congress executive is stated to be based on a plan advanced by Rt. Hon. George Lansbury, M.P., first commissioner of works in the Labor government of Great Britain. Attention was directed to an interview with Mr. Lansbury published in a current edition of the Canadian Unionist, organ of the All-Canadian Congress of Labor.

Sir Robert Balfour Dead

Was Well Known In Canada and the United States

London, Eng.—Death has claimed Sir Robert Balfour, a prominent figure in shipbuilding circles and former member of parliament for the Patrick division of New Glasgow. He was in his 88th year.

Sir Robert was a partner in the firm of Balfour, Williamson and Company. He was well known in Canada and the United States, having lived for 25 years in the States, chiefly in San Francisco.

New Chief For Fernie

BUY ALBERTA MADE PRODUCTS FOR CHRISTMAS

At this season of the year when
thoughts are turning to Christmas and
the exchanging of presents it would
be well for the citizens of Alberta to
remember the efforts of the Alberta
Development Board in its campaign
urging the purchase of Alberta Made
Goods.

The merchants of the province co-
operate in stocking and displaying
Alberta Made Products. How can we
expect the retailer to do his part if
the consumers do not take the step
in the right direction and make their
purchases wherever possible of the
products of Alberta's factories?

The manufacturers of the Province
are prepared to stand by the quality
of their products and only ask for
business on the merits of their goods.
They make as good, if not better, pro-
ducts as are produced elsewhere.

The farmers of the district know
that part of their revenue comes from
the city and it is only an act of co-
operation for them to buy Alberta
made goods in return. Money spent in

our own province comes back to us
again but money spent for goods pro-
duced outside of the province goes
away and keeps on travelling.

It is only by working in harmony
that the greatest good can be accom-
plished. Ask your storekeeper to show
you some of the products of Alberta's
factories and compare the prices and
values with other manufacturers. Let's
all work together this Christmas and
support Alberta Made Products.

THE PUBLIC HAS A SHORT MEMORY

In 1904 Pyles Perfume was favor-
ably known to most American house-
wives. That year the owners spent
\$500,000 in advertising. It was an out-
standing success.

Three years later the owners felt it
was so well known that they could
afford to save that \$500,000 a year.
They ceased to advertise.

Eight years later, in 1915, the whole
works, goodwill and all, was sold for
\$12,000. The public has a short mem-
ory.

A short time ago the writer was
told by a member of the advertising
department of one of the largest soap
manufacturers that, according to their
surveys, a manufacturer of a new
brand of toilet soap today could not
attain national distribution and con-
sumption of his product for less than
five million dollars or in less than five
years time. The public must be told—
and told again.

Probably no advertising appropria-
tion has received more publicity or
been discussed more than that of the
American Tobacco Company for ad-
vertising Lucky Strike cigarettes.

For advertising this single commodi-
ty and brand they appropriated \$12,-
000,000 for the year 1929. Of this
amount daily newspapers are receiv-
ing \$6,500,000. The public must be
constantly reminded, which is a news-
paper's function.

What holds true of Lucky Strike
holds true of everything people eat,
wear or use. It is the function of the
printer to also help to tell this story.

Oswald (writing to a friend): "Dear
Bob: You know, I love Sybil, but her
father objects to our marriage, and if
she can't be mine I'll have to commit
suicide. What do you advise?"

His friend answered: "Carbolic acid,
old man."

Rail Heads Aid Amateur Sport

1.—Mr. E. W. Beatty.
2.—Mr. A. D. MacTier.
3.—Sir George McLaren Brown.

Included among a number of prominent Canadians who are sup-
porting the move to popularize
British Rugby football in the
Dominion are E. W. Beatty, chair-
man and president of the Canadian
Pacific Railway; and honorary
president of the newly formed
British Rugby Union of Canada;
A. D. MacTier, vice-president
eastern lines of the railway, and
honorary vice-president of the
Union and donator of the highly
prized and hard fought for Mac-
Tier Cup; and Sir George McLaren
Brown, European general manager
of the company, who will accord
representation at the London head-
quarters of the British Rugby
Union. It is hoped to bring to-
gether in Canada amateur teams
from all over the Empire. J. Fyfe-
Smith, of Vancouver, is president
of the Canadian Union.

A BUYING GUIDE !

BEFORE you order dinner at a restaurant you consult the
bill-of-fare. Before you take a long trip by motor-car, you
pore over road maps. Before you start out on a shopping tour
you should consult the advertisements in this paper. For the
same reasons!

The advertising columns are a buying guide to you in the pur-
chase of everything you need—including amusements! A guide
that saves your time and conserves your energy; that saves useless
steps and guards against false ones; that puts the s-t-r-e-t-c-h
in family budgets.

The advertisements in this paper are so interesting, it is diffi-
cult to see how anyone could overlook them fail to profit
by them. Just check with yourself and be sure that you are read-
ing the advertisements regularly—the big ones and the little ones.
It is time well spent always.

AVOID TIME WASTING, MONEY WASTING
DETOURS ON THE ROAD TO MERCHANDISE
VALUE. READ THE ADVERTISING "ROAD MAPS."

World Cruising Damsels Wear Great Variety of Costumes

ROUND-THE-WORLD PAJAMA GIRLS

People to whom a world cruise or any other long winter voyage is an experience yet to be enjoyed may wonder what those more fortunate folk do to pass the time while they are sailing the Seven Seas. It may interest the stay-at-homes to know that the time spent on these pleasure jaunts rarely hangs heavy, for all sorts of diversions are planned for the entertainment of the globe-trotters. The bridge fiend has his bridge parties, the amateur photographer his camera expeditions and the dancer his dancing, but one of the most fascinating of all, to the fair sex, at least, is that of purchasing and trying on costumes typical of the various far-off lands visited. Pictured above,

for instance, is a bevy of beauties photographed aboard the world-cruising Canadian Pacific liner "Empress of Australia" en route from China to Japan during her 1928-29 annual round the world cruise. They are blossoming out in dazzling pajama suits which they purchased in the Orient. This collection of pseudo-Chinese maidens must have caused many a masculine heart to miss a beat or two! The other group of ladies are wearing mandarin coats acquired during an earlier trip around the world.

At practically every port of importance it is possible for passengers who are so inclined to purchase some little memento, be it a shawl, a miniature Buddha, a

ring, a native doll, a walking stick or other souvenir of their travels. During a world cruise of the "Empress of Scotland" several years ago a cruise member from Denver, Col., purchased a toy elephant for each member of the Denver Kiwanis Club of which he was a member and posed with his collection of pachyderms for the vessel's corps of amateur photographers. Spanish shawls, parasols and many other articles complete the list of possibilities for globe-trotters with a penchant for collecting.

The "Empress of Australia" will sail again on a globe-girdling voyage, leaving New York December 2, 1929, for a cruise of 137 days.

DO COUNTRY GIRLS MAKE
THE BEST WIVES?

Whether country girls make the best wives is being publicly debated by two French intellectual leaders, says a press despatch from Paris. Pierre, Mille, novelist and editorial writer, thinks they do because he believes they recognize man as a superior being and take better care of him.

Madame Maria Verone, one of the first woman lawyers and president of the French League for the Rights of Women, says there isn't and difference between farm and city girls, but her chief attention was given to the whacks at the old fashioned man who thinks a woman's place is in the home and that "obey" is the most important part of the marriage ceremony.

Mille has been having quite a bit of correspondence with men of the old school who think modern girls altogether too "supple." He agrees with some of them that the provinces still afford a man some chance of finding a good housekeeper who knows how to play second fiddle. Madame Verone, however, retorts that the country girl, like the town girl, regards herself as fully man's equal and that while she allows him to imagine he is of much importance, she never for a minute consents to recognize her husband as "master" of the house unless she, at his side, is the "mistress."

All this is still a live topic in France where the "woman's rights" movement moves slowly, with little chance of gaining the vote until several old senators retire or die. The chamber of deputies, composed of younger men and in closer touch with the people, twice has passed a limited vote bill which the senate ignored.

Girls are like the ocean—they look green, but they get awfully rough at times.

The man who killed himself because he held a poor isidie hand probably wanted to get a look at Gabriel's trump.

A famous bachelor says he has half a mind to get married. That's all he needs.

One reason why matrimony succeeded in the old days was because the girl didn't sigh and say: "Thank goodness, I needn't work any more."

Banks are funny. They trust half a million to a crooked messenger boy and won't take an honest man's note for fifty.

PASS THE GLUE

The doctor told him to take a pickle just before going to bed and see if he could keep it on his stomach. Next day he told the doctor it rolled off when he turned over.

She: "Today's my birthday, darling." "And shortly we may be married?" She: "Never mind the future; how about the present?"

The Dear Boy

Did the children behave when you bathed them?" asked the mistress of the new French nurse.

"All but ze biggest boy—and mira-bleu!—how he fight and kick and near tear ze face off me before I git him in."

"Which biggest boy—we've only one boy and he's only two years old."

"Eet is no him at all I mean. 'Tis a boy who wears glasses and has ze curly hair."

"Boy! Boy! That's not a boy! That's my husband!"

Frau Schroeter-Vorescon, claims the record parachute drop for women from 2,500 metres (8,200 feet). She carried a sealed altitude indicator.

Right Hon. Winston Churchill, former chancellor of the exchequer, has been elected lord rector of Edinburgh University.

Marquis Katsunosuke Inouye, former Japanese ambassador to London, died November 4, at Tokio. He was 68 years old.

Dr. Frederick Montizambert, former director-general of public health and sanitary advisor to the Dominion government, died at his residence, in Ottawa, after a prolonged illness.

The London papers say that the Prince of Wales is planning to return to Africa to finish the tour which was so suddenly interrupted last year by the serious illness of King George.

Legal difficulties in the way of purchasing by the Prince of Wales, of a section of school lands in Alberta as part of the E.P. Ranch have been set aside as a result of an order-in-council officially published in the Canadian Gazette.

The title of the forthcoming book of Georges Clemenceau, former French premier, on which he has worked so hard during his recent illness is, "Grandeur and Misery of a Victory."

To safeguard the child from damage that worms cause, use Miller's Worm Powders, the medicine par excellence for children. These powders will clear the system entirely of worms, will regulate and stimulate the organs injuriously affected by the worms, and will encourage healthful operation of the digestive processes. As a vermifuge it can be relied on for its effectiveness.

Grain In Storage

Shrinkage in Volume Reported Commencing October 22nd.

Grain storage in Prairie bins shrunk in volume on October 22nd for the first time during the month. Up to that time there had been a continued rise. The total storage in the Prairie elevators amounted at that date to 86,791,000 bushels, compared with a capacity of 178,000,000 bushels.

Used by Doctors

Many doctors recommend Minard's as the best Liniment made. They use it for many ills.

Big Development Seen For Next Year In Connection With Alberta Bituminous Sands

S. C. Ellis, of the Federal Department of Natural Resources, back from his summer's work in the north, expressed his belief that there will be large developments next year in connection with the McMurray bituminous sands. He is convinced from what he has seen of low cost surfaced roads in the United States that there is a bright future for the McMurray sands for road surfacing purposes.

**BABY'S OWN TABLETS
WIN GREAT PRAISE**

Many Mothers Always Keep Them In the House

Thousands of mothers state that they know of no other medicine for little ones to equal Baby's Own Tablets—that they always keep the Tablets in the home as a preventive of childhood ailments, or if sickness does suddenly grip their little ones they feel safe with such a remedy at hand.

Concerning the use of the Tablets Mrs. Donat Ploudre, Tngwick, Que., writes:—"I have nothing but praise for Baby's Own Tablets. They are the only medicine I have ever given my two little ones and I am glad to state that the Tablets have always kept them in perfect health. I feel so safe with the Tablets that I always keep a box in the house."

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels, sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fever and make the cutting of teeth painless. The Tablets are absolutely safe, being guaranteed free from all injurious drugs. They are sold by all medicine dealers or by mail at 25c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Crossed River On Skis

Vienna Men Claim Speed Of Twelve Miles An Hour

A most amusing spectacle recently greeted the spectators on the London Embankment, when, without any warning, they suddenly came across two men, clad in bathing suits, attempting to cross the Thames by means of water skis. It did not take many minutes for a wondering crowd to collect, and then, urged on by cheers and laughter, the two men, Student Franz Hirsch and Professor Michael Mitter, both from Vienna, set off on their journey across the river and back.

The skis were made of basket-work frames, and covered with waterproof. The wearer carries a small paddle with which he propels himself along. Apparently they answer their purpose well, and the two wearers claimed that they had achieved up to twelve miles per hour on the river Danube.

There is no poisonous ingredient in Holloway's Corn Remover, and it can be used without danger or injury.

Precision In Levelling

Only Slight Error Made In Running Line Of Levels 3,647 Miles

In a line of precise levels run across the continent from mean sea level on the Atlantic to mean sea level on the Pacific, the engineers of the Geodetic Survey of Canada obtained an apparent difference of elevation of only about six inches. On the assumption that the mean sea levels of the two oceans are about the same, this indicates that only the above slight error was made in running a line of levels 3,647 miles in length.

An Oil That Is Prized Everywhere.
—Dr. Thomas' Electric Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a small section, but as soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

Husband: "You accuse me of reckless extravagance. When did I ever make a useless purchase?"
Wife: "What about that fire extinguisher you bought a year ago. We've never used it once."

The population of the Roman Empire at the time of Christ has been estimated to be 70,000,000.

Washable Shoes

Cotton Footwear Said To Be More Comfortable Than Leather

It won't be long now until the ladies will take their shoes off, give them a few scrapes on the washboard, and hang them out to dry.

Washable cotton shoes were among the most interesting exhibits at the fashion show of the National Association of Cotton Manufacturers held in Boston, Mass.

The shoes in addition to being washable, will be much lighter and more comfortable than leather, exhibitors said. They are made of sudanette and sudanette faille—new cotton fabrics—and will have heels built on thin leather soles. The uppers, in pastel shades, will be bordered with a fringe of beauvoir embroidery.

B.C. Coal Production

The production of coal in the province of British Columbia for the first nine months of the year which ended with September 30, shows a total output of 1,693,340 tons. Of this total, Vancouver Island collieries produced 850,364 tons.

FAINT, DIZZY SPELLS

Had To Sleep Propped Up In Bed

Mrs. Norman Bishop, Salisbury, N.B., writes:—"I was troubled with faint and dizzy spells and when I would lie down I would suffer terribly with smothering spells. I got so bad I had to sleep propped up in bed."

"My doctor said it was my heart and nerves, and that I needed a good heart tonic."

"I was advised to take

and I had not taken one box when I could lie down and sleep like a child."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Unnecessary Questions

Policemen of London are secretly complaining that they must be too versatile. In a recent police examination they were asked, among other things, how they would repair a stained floor in a house, make a three-legged stool or arrange a film show for children between 10 and 15.

Use Minard's Liniment In the Stables.

Zoo records indicate that animals tend to live longer if they are well cared for in captivity than those that live in a wild state.

Almost every part of the whale has a commercial value.

LIVING WITH PEOPLE OF OTHER RACES

Golden Text: "Of a truth I perceive that God is no respecter of persons; but in every nation he that feareth Him, and worketh righteousness, is acceptable to Him."—Acts 10:34, 35.

Lesson: Ruth 1:1-18; John 4:5-10; Acts 10:1 to 11:18; Romans 1:14; Galatians 3:28, 29.

Devotional Reading: Ephesians 3:14-21.

Explanations and Comments

Racial Prejudices Must Be Overcome, Acts 10:1-15.—There was a Roman centurion at Caesarea, Cornelius by name, a very devout man who feared God, and was generous with the poor. One day in a vision he seemed to hear an angel saying to him, "Thy prayers and thine alms have gone up for a memorial before God," and bidding him send to Joppa for a man named Peter. At once Cornelius sent two of his servants in search of Peter. Joppa was on the seacoast thirty miles west of Jerusalem.

On the morrow as the servants were approaching Joppa, Peter went up on the housetop to pray. He was hungry and while waiting for food to be prepared, he fell into a trance. In his trance Peter beheld a receptacle resembling a great sheet let down from heaven by its four corners, and in it all manner of four-footed beasts and creeping things and birds, and he heard a voice bidding him kill and eat. "Not so, Lord, I have never eaten anything that is common or unclean," Peter exclaimed, horrified. Peter had strictly observed the Levitical law which prescribed what animals could be eaten and how they should be slaughtered.

God Is No Respector Of Persons, Acts 10:17-35.—While Peter was pondering the meaning of the vision, the messengers sent by Cornelius arrived. Peter called them in and lodged them over night, putting at once into practice his understanding of the vision, for they were men of another race, whom once he would have called unclean. The day following Peter went with the messengers to the home of Cornelius. He took the precaution to take with him six brethren, for he felt he was doing a venturesome thing and he wanted witnesses. Caesarea was on the seacoast thirty miles from Joppa. On reaching there, he found Cornelius and many Gentile kinsmen and friends of the latter awaiting him. Cornelius told about the vision which had led him to send for the apostle, and added, "Now therefore we are all here present in the sight of God, to hear all things that have been commanded thee of the Lord."

"And Peter opened his mouth and said" (these words indicate the solemnity of the occasion and the weightiness of Peter's message): "God has no favorites, and he who reverences Him and lives a good life in any nation is welcomed by Him."—Moffatt's Translation.

For Detecting Icebergs

Method Perfected By Dr. Barnes Of McGill University

A method of detecting in fog or at night the proximity of icebergs at sea by recording their explosions as they disintegrate has been perfected by Dr. Howard T. Barnes, of McGill University, who has returned from a voyage of experiment off Newfoundland.

Attempts were made with a marine microphone to pick up the sounds of the explosions of the icebergs as they broke in the warmer water, but nothing was heard.

Then an improvised microphone, consisting of a rubber hose with a funnel attached to one end and a sheet rubber placed over it to make it waterproof, was used. It was ascertained that the explosions could be recorded up to a distance of six miles.

**Your Kids
Need Sugar**

It supplies body fuel for the energy that keeps them going and growing. No need to stuff or get fat and lazy.

Use WRIGLEY'S for sugar and flavor, and see how ruddily the boys and girls respond.

A New Ailment

People Seem To Be Troubled With Health Madness

Articles are already appearing in daily papers on how to conquer "autumn depression." They follow quickly on tips for overcoming summer slackness. Very soon we shall be told the best way of relieving winter gloom, and after that we shall look eagerly for a specific against spring dejection. Every season has its disability. We are rapidly becoming health mad. The great majority seem to be unable to make up their minds what to eat, drink, wear, or do without assistance.

The first patent of the telephone was granted in 1876.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, is loved by Grace Farrel, the cigarette girl, but he does not know that. He marries Molly Winton, a ballad singer, and wins fame as a composer of popular songs. When their baby, Junior, is about two years old, Molly elopes with John Perry, Al's best friend, taking the child. Molly consents to a last farewell between Al and Junior before she sails for France. After this takes place at a park entrance Al walks towards the center of the city, completely broken by his tragic loss. He plans to leave the Broadway night life and disappear. The lights of evening flick the sky.

CHAPTER XXI.

But, in order to live, Al knew he must create a new life for himself. The old life was closed. He felt himself entirely alien to night clubs and the whole Broadway life; if he wrote a song it would be so tragic and filled with pain that no song-publisher or revue producer would want it. No, there was nothing for him to do but disappear from the old haunts.

In a few days, when he had pulled himself together, he would see Cline and collect on his share of the ownership of the Club Bombo. Then—goodbye!

He had reached the end of the park, at 59th Street. How the city roared; the night life was beginning, the life of which he had been a living part only a short time ago. He glanced at his watch—almost six o'clock. They were ordering all the visitors ashore from the Ile de France; in a few moments the gang-plank would be lifted and the big floating hotel of a liner would pull slowly from the dock.

Days passed; and Broadway saw no more of Al Stone. Where had he gone? His friends asked Billy Cline, his former business partner, but Billy could only shake his head sadly and say he didn't know. Marcus wanted Al to write some new numbers for a revue he had in rehearsal, but there was no Al to be found.

"What do you think's become of him?" asked Marcus of another songwriter.

"The river?" suggested the composer.

"No," Marcus shook his head vigorously. "I don't think Al would take

HELPED DURING MIDDLE AGE

Woman Praises Lydia E. Pinkham's Vegetable Compound

Sarnia, Ont.—"I am willing to answer letters from other women, to tell them the wonderful good Lydia E. Pinkham's Vegetable Compound did me. I cannot be thankful enough for the benefits I received during the Change of Life. I do housework and my troubles made me unfit to work. A friend advised me to try the Vegetable Compound. I felt great relief at once, began to regain my appetite, and my nerves got better. I will recommend your medicine to all with troubles like I had."—MRS. JOHN BENSON, 162 N. Christina St., Sarnia, Ontario.

W. N. U. 1811

his own life. He loves his boy too much. He'll live for that boy—you'll see. He may slip terribly, but hope for his boy will keep him going somewhere, somehow. We can't tell—he may be perfectly all right; he may have gone on a world cruise to forget, or he may have gone to the western country for a while.

So the conjectures passed from mouth to mouth, up and down the White Way. But Al was still in New York, living in a cheap hotel, wearing shabby clothes, his money in the bank, forgotten. He was a shadow of his former self. He walked the streets by day and night, occasionally turning in to sleep. But always he stayed away from the fashionable streets and the Broadway section. He developed a terrible dread that he might meet some of his friends and he kept a constant, furtive lookout for familiar figures. If he saw one he quickly crossed the street, turned the corner and disappeared.

He was still searching desperately for a plan whereby he could rebuild his life on some new basis. But that could not be done, because he was definitely of the night club life. He had become a singing waiter while still in his teens—the cabaret life was the only one he understood. He could only wander—through the Ghetto, along the waterfront, through Little Italy. He made friends with odd characters—fish peddlers, park bums, old Irish cabbies. But always he was drifting downward.

Then came the day when he happened to glance across the street and saw a face he knew. Surely that was Grace, who used to be a cigarette girl at Blackie Joe's place near the Village. As she stared intently at him Al dodged rapidly round the nearest corner.

Grace's eyes followed Al in astonishment as he hurried around the corner and disappeared. At her first glimpse of him she had not been sure of his identity; it was a year since she had seen him and during that year he had almost become a different person in appearance. His lithe, self-confident walk was gone, his clothes were old and nondescript, his face was thinner and the cheerful kindly glow in his eyes had vanished.

Nevertheless the man who stared at her in sudden recognition for a moment was Al—she was sure of it. She walked back to the corner and followed the direction he had taken. But either Al moved faster than she or he had darted up an alley, for she saw no sign of him. Thoughtfully she retraced her steps, her mood and expression sobered by the tragic implications of the sight she had just witnessed. So that was Al, breezy, wise-cracking, generous Al—the man who had been the hero of her girlhood three years ago, the man she had loved so devotedly! That was the youthful singing waiter whose rapid rise to fame had been one of the romances of Broadway and whose disappearance into obscurity had been one of the mysteries of the Street of Lights.

Grace had followed Al's career with the keenest attention from the fateful time when he left Blackie's night club until recently. She knew every story of his triumphs, every version of his disastrous marriage, as they were gossiped about in cabaret circles, uptown and down, and as they appeared in newspapers and theatrical weeklies. For a year after Al left Blackie's her love for him had remained, first a throbbing recollection within her, then a faint murmur from the past.

But after he ceased to visit Blackie's and became so definitely a figure belonging to Broadway, this spirit of love became like the last note of an echo—it seemed to pass away lightly. Before that he had been a part of her life, afterward he was just a graceful

and vague figure who had once stirred her as no man had been able to do since that time.

Grace had stayed on at Blackie Joe's. She had no scintillating talent to carry her to the peaks of Broadway success; she could not sing and dance professionally. She possessed a lovely and delicate beauty, unswerving loyalty, keen intuition, plain common-sense and a frank, unspiced nature. These qualities, while they may be among the most important in life, may not win fame for the persons who possess them.

Grace was obscure, but still she had scored her little successes. After Al was swallowed up by Broadway, Blackie Joe, himself, had kept a kindly eye on her and saw she was protected from the riff-raff among his customers. Soon he had promoted her from the job of cigarette girl and raised her salary. Now she was his assistant manager; she kept track of his accounts and checked the waiters when they carried food and drink to the customers.

Blackie had felt terribly sorry for Grace after Al went off to marry Molly—he was the only living person, with the exception of Grace, herself, who had any conception of the deep love the former cigarette girl had for Al. Blackie often asked himself—Why on earth wasn't Al able to see that? When Blackie read of Molly's desertion he nodded sadly.

Now, as Grace pursued her way, a flood of memories swept across her mind—Al as he used to look in his waiter clothes, Al as he had sung his first love ballad—"Always"—to Molly on the floor of Blackie's club, Al as she had once seen him at an uptown night club, resplendent in fine clothes, Al as she had seen his picture in the papers with Molly and his baby Junior.

Grace still recalled how the news of Junior's arrival had sent a stabbing throb through her heart that she did not understand. Then came an intense longing to see the baby that Al fathered. But that too was a faint memory—now.

It was afternoon and Grace was not due at Blackie's until evening. However, she wanted to tell the night club owner her news, so she changed her course and mounted the familiar, shabby steps. The main room was dark and deserted, but Blackie was in his office. He glanced up as Grace entered.

(To Be Continued.)

Asthma Brings Misery, but Dr. J. D. Kellogg's Asthma Remedy will replace the misery with welcome relief. Inhaled as smoke or vapor it reaches the very innermost recesses of the bronchial passages and soothes them. Restriction passes and easy breathing returns. If you know as well how this remedy would help you as do thousands of grateful users, there would be a package in your home tonight. Try it.

Death by boiling was a favorite method of execution in the time of Henry VIII.

Send Mail By Rockets

Claimed That In Short Time Mail Will Be Carried By Rocket From Berlin To New York

It is confidently asserted by the German Professor Oberth, that in a short time mail will be sent by rocket from Berlin to New York by a single propulsion. This means that letters thus sent will arrive in New York about a half hour later. The matter is taken so seriously that the American ambassador to Germany was prompted to say: "I must call attention to the fact that our government will insist that life and property be not endangered by the rockets landing. I cannot say what guarantees would be required, but if Professor Oberth asks permission to shoot a rocket to America the state department must be informed." As the American ambassador, Mr. Schurman, is a man of broad intelligence, it may be assumed that his acceptance of the possibility of such a feat is not ridiculous.

Rockets are, seemingly, the newest toys and instruments of a scientific age which prefers to leave nothing to the imagination. Rocketeers will soon be joining racketeers to disturb our peace and to turn the incredible into the commonplace.

John Bull a Poor Advertiser

Discovered That Great German Flying Boat Fitted With Engines Of British Design

When the great German flying boat sailed over Lake Constance the other day with the record human load of 169 persons, the world of aviation properly hailed it for what it appeared to be—a new triumph in the air for Germany. But all the story was not told at once. Germany may not claim all the triumph. The great craft is fitted with twelve engines, 523 horsepower each, of the British Jupiter design, made in German workshops under British license.

Little, if anything, appears to have been said about these engines until an aviation critic in Great Britain came out with the warning that the flight in question "throws Britain further behind in civil aviation and makes Germany the leader of commercial flight throughout Europe." Then the truth was told. As one Canadian correspondent in London says: "The curious British mentality which finds Britain backward in thousands of ways and foreign countries much more go-ahead has received a rude shock from the discovery about these engines." Once again John Bull has shown himself to be a poor advertiser.—Victoria Daily Times.

Tree Seeds For Empire Reforestation

A valuable Empire service is being carried out by the Forest Service, Department of the Interior, in furnishing seed of Douglas fir and other tree species to the British Forestry Commission for its use in reforestation operations in Great Britain. The New Zealand Government also takes large quantities of seed. Practically all the seed thus distributed is extracted at the Forest Service seed-extraction plant at New Westminster, British Columbia.

Little Helps For This Week

"Thou wilt keep him in perfect peace, whose mind is stayed on Thee; because he trusteth in Thee."—Isaiah xxvi. 3.

Oh, this is blessing, this is rest! Into Thine arms, O Lord I flee; I hide me in Thy faithful breast, And pour out all my soul to Thee. O tenderness! O truth divine! Lord, I am altogether Thine. I have bowed down.—I need not flee, Peace, peace is mine in trusting Thee! —Anna Laetitia Waring.

Place your whole trust in the Lord; let Him alone be your fear and your love. He Himself will answer for you, and will do what is best for you. Here you have "No continuing city," and wherever you are you are a stranger and a pilgrim; nor will you ever find rest until you are inwardly united to Christ.—Thomas A. Kempis.

Persian Balm creates and preserves lovely and youthful complexions. Tones and stimulates the skin. Fragrant as a flower. Cool as morning dew. Swiftly absorbed by the tissues, making the skin wonderfully soft-textured. Unrivalled as an aid to feminine elegance. Delightful to use. Imparts additional charm to the daintiest of women. Persian Balm is the one toilet requisite for the exacting woman. Peerless as a beautifier.

Planes arriving at or departing from the Chicago district have 29 landing fields from which to choose.

DON'T MISS IT

THAT DRY WELL

The human body can live without food for six or seven days if there is plenty of water to drink but it will not live three days if deprived of food and water. Water is essential to the proper growth of the body and to its proper functioning. Not just water, but pure water in a necessity.

We have finished one of the driest seasons for many years. Sloughs and creeks are dry all over the province. Wells are either very low or quite dry. Under those conditions water has to be used from where it can be found, irrespective of whether it is known to be pure or not. Already several cases of typhoid fever have been admitted to city hospitals from country points. Typhoid is a water born disease.

Again when moisture in any quantity does come, the well will fill and much of the water will be surface water—always dirty and impure. Before using water from an untested source, boil and chlorinate it. Before using the newly filled well water, boil and chlorinate and send a sample to the Health Department to be tested. It is worth it, and costs much less than six weeks in the hospital with Typhoid Fever or Dysentery.

Literature on wells and the chlorination of water may be had free from the Canadian Red Cross Society, 407 Civic Block, Edmonton.

BUY-AT-HOME CAMPAIGN IS UNDER WAY IN ARTHUR

A.C. Buschlen, of Buschlen's Pharmacy, and F. O. Henry, of Henry's Drug Store, are taking a prominent part in the Buy-At-Home Campaign, which is now under way in Arthur, Ont. Large advertising space is being used in the local press during the campaign in an effort to bring about a better business relationship between resident and merchant in the town and vicinity and thus make the community more progressive.

Surrounded by "ads" of the town's leading business men, the following was published last week under the caption, "The Back Seat Driver."

"We all know the nuisance who guides the destiny of the automobile from the rear seat, the person who always thinks he could handle the machine much more capably than the driver. He is like the man who stands on the sidelines of the game of life criticizing the actions of those who are doing things, but who fails to get into the battle himself. Every office has one but the boss gets tired and

chucks him out.

"There are people like this in every community. You know well the man who complains about conditions, who is always opposed to everything, who does not work because he says there is no work to do and the community is going to the dogs. He stands out in contrast to the person who gets into the fight, makes the best of every situation and when he is not satisfied with conditions makes an honest-to-goodness effort to improve them instead of standing around and whining.

"No man can be happy if he is always running away from the problems of life. What can you do to enliven the activities in Arthur and make it a better community in which to live? Start anywhere, but do something. Don't leave the work to someone else. Get that community spirit and fight. Every sincere effort at community betterment on your part makes you so much bigger. Boost your community that you may be able to boast it. Have no sympathy for the habitual knocker. Buy your goods in Arthur. This will mean the success of your merchant and a bigger and better Community."

EYES TOO IMPORTANT TO BE TRIFLED WITH

The three hundredth anniversary of the introduction of the spectacle or eye glass was recently observed. The following article appearing in the Jackson Tribune, Jackson, Mich., and reprinted in the Calgary Albertan, is appropriate at this time. In part it reads:

"To measure the amount of error in the refraction of the human eye requires the services of one skilled in such work; and this service cannot be rendered by mail, telephone or in any way save by the personal examination of the patient by one skilled in the profession. Not only do these fraudulent advertisers fail to relieve eye troubles, their victims almost without exception suffer actual injury, for the spectacles sold are but a fair grade of magnifying glasses, which make print look larger; and, if so convinced that a benefit has been received, consultation with a competent optometrist may be deferred until real relief becomes a difficult and costly matter.

"Grinding a pair of lenses to meet the needs of a pair of eyes is an intricate and exacting process; and the advertiser who offers to perform this feat without even examining the eyes to be fitted, and at a price often less than the actual labor cost of the work is so manifestly a swindler that it is strange indeed that reputable advertising mediums accept their business, that a government-owned post office department permits them to use the mails and, strangest of all, that ordinary intelligent men and women ans-

wer the advertising and patronize the advertiser."

"I never knew what happiness meant until I got married," remarked a writer.

STOCKS AND BONDS

We cannot stress too strongly the fact that present bond prices are attractive. The recent large reductions in brokers' loans, together with the adjustment of the New York Reserve rediscount rate from 6 per cent to 5 per cent and the reduction of ½ per cent to a 5 per cent level in the London rate, undoubtedly means an immediate outlook for a healthy bond market. There seems to be little doubt but that the bond market will, as days go by, continue more active and reach higher levels.
